Author(s): Basil Dickins

Date(s): Not Dated.

Document Type/Physical Description: Type-written manuscript, 622 pgs.

Fonds/Collection Name: Ronnie Shephard Fonds

Series: Operational Research and Strategic Bombing

File/Box Number: Box 2

Original Archival Reference: N/A

Item Description: This is a draft manuscript of a lengthy report compiled by the RAF Bomber Command Operational Research Section, probably some time in 1945. The report was authored by Dr. Basil Dickins, a rising star in the field of physics who served as Section head during the war. Using a thematic approach it explores in excellent detail the challenges inherent in strategic bombing, making it a valuable source for both historians of air power and those studying Europe in the Second World War.

Keywords: Bomber Command; Operational Research; Operations; Technique; Bombing; Navigation

When citing material that has been digitized from other archives, the LMH Archive encourages users to cite the original reference information provided in the above field.

The purpose of the Laurier Military History Archive is to acquire, preserve and make available documents relating to the Canadian and international experience of military conflict in the twentieth and twenty-first centuries.
